### DETAILED ACTION

1. Applicant's preliminary amendments filed 9/24/01 has been entered.  
Claims 1-16 have been cancelled.  
Claims 17-39 have been added and are pending.

#### *Restriction Requirement*

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 17-27, drawn to a method of inducing an antibody response and preventing ricin intoxication by administering chemically deglycosylated ricin A-chain, classified in Class 514, subclass 885.

II. Claims 28-39, drawn to vaccines, pharmaceutical compositions and immunogenic compositions each comprising chemically deglycosylated ricin A-chain; classified in Class 424, subclass 185.1.

The Inventions are distinct, each from the other because:

3. Groups II and I are related as product and process of using. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method can be practiced with ricin A-chain that is deglycosylated by expression in a prokaryotic expression system.

4. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search, which would not be completely co-extensive. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
